*Based on a full charge. Estimated range using Worldwide Harmonized Light Vehicle Test Procedure (WLTP). Actual range varies with conditions such as external elements like temperature, driving behaviors, route profile, vehicle maintenance, and lithium-ion battery age and condition. WLTP Overall Range reflects a combined driving cycle. This test was conducted in controlled conditions.
+Charge time based on manufacturer computer engineering simulations, tested values, and EPA-estimated range-calculation methodology. The charging rate decreases as battery reaches full capacity. Your results may vary based on peak charging times and battery state of charge. Actual range varies with conditions such as external environment, vehicle use, vehicle maintenance, high-voltage battery age, and state of health.
